Education

Georgia Institute of Technology

Atlanta, GA

B.S. in Computer Science — Concentration in Information Internetworks, Artificial Intelligence

- Cumulative GPA: 3.34/4.00

Experience

Undergraduate Machine Learning Researcher

Atlanta, GA

Georgia Tech Vertically Integrated Projects (VIP) — Baseball Analytics

Jan. 2026 – Present

- Led a 4-person Stuff+ subgroup within a 20-member research team and authored roughly 80% of a 650-line core Python pipeline analyzing over 1M pitch records across 3 years, producing coach-facing pitch-quality rankings.
- Re-engineered the modeling workflow with handedness normalization, feature engineering, leakage-safe train/test splits, and XGBoost + FLAML, producing Stuff+ leaderboards across roughly two seasons of Georgia Tech and opponent data.
- Building AWS data infrastructure to centralize 30M TrackMan pitches using RDS PostgreSQL, S3, Terraform, IAM, and GitHub Actions to support shared data access and repeatable deployment across baseball analytics projects.

Projects

LineLens | Python, Streamlit, Supabase, REST APIs

May 2026 – Present

- Built and deployed a Python/Streamlit MLB betting-market analytics MVP processing 700–800 odds outcomes from 9 sportsbooks across 10–15 games and 3 market types per full-slate refresh.
- Developed a ranking pipeline using implied probability, cross-book market consensus, relative edge, sportsbook coverage, and confidence weighting to generate comparative metrics and ranked decision outputs.
- Implemented Supabase-backed paper tracking with saved stakes and odds, portfolio performance metrics, persistent history, and automated grading from completed MLB scores.

GT WebDev — Project Discovery MVP | MongoDB, Express.js, React.js, Node.js, Git

Feb. 2026 – Apr. 2026

- Implemented secure registration/login and authenticated profile retrieval/update using Express.js, MongoDB, JWT, and bcrypt, including protected API routes for user-specific application workflows.
- Designed MongoDB/Mongoose user and project models and implemented project creation, ownership authorization, and username/email availability checks through Express.js APIs.
- Collaborated on a 7-person semester-long team to build, test, and debug a functional MERN MVP, integrating front-end/backend components through Git-based review.

Leadership & Campus Involvement

Data Science @ Georgia Tech

Atlanta, GA

Data Science Bootcamp

Feb. 2026 – Apr. 2026

- Completed 30+ hours across 8 hands-on workshops using Python, Pandas, NumPy, scikit-learn, Matplotlib, and Seaborn for exploratory analysis, data cleaning, preprocessing, visualization, and machine-learning workflows.
- Applied train/test splitting, cross-validation, feature scaling, PCA, feature selection, hyperparameter tuning, and ensemble methods while gaining exposure to LoRA and RAG concepts.

Pi Kappa Alpha

Atlanta, GA

Vice President of Philanthropy

Jan. 2026 – Present

- Helped organize a 12-bout Fight for Life charity boxing event for roughly 500 attendees that raised \$35K+ and supported outreach across 6 sponsors for the 130-member chapter.
- Leading a Fall 2026 charity 5K targeting \$6K and roughly 200 participants, coordinating sponsor and partner outreach, campus logistics, volunteer staffing, and execution.

Additional Experience & Certifications

Head Lifeguard

Atlanta, GA

United Pools

May 2024 – Aug. 2025

- Managed scheduling and shift coverage for a 20-lifeguard team during my second summer while helping oversee pool safety, staffing, and emergency readiness for up to 50 swimmers at a time.

FAA Private Pilot Training

Aug. 2024 – Dec. 2024

- Completed 60+ hours of flight and ground training in navigation, weather analysis, aeronautical decision-making, and risk management; passed FAA Private Pilot Airplane knowledge exam.

Technical Skills & Tools

Languages: Python, Java, C++, JavaScript, SQL

Machine Learning & Data: Pandas, NumPy, scikit-learn, XGBoost, FLAML, Matplotlib, Seaborn, PyTorch, Keras, Excel

Cloud, Web & Developer Tools: AWS RDS, S3, Terraform, IAM, GitHub Actions, Streamlit, Node.js, Express.js, MongoDB, Supabase, REST APIs, Git/GitHub
