Education

Georgia Institute of Technology

B.S. in Computer Science — Concentration in Information Internetworks, Artificial Intelligence

Atlanta, GA

Expected May 2028

- Cumulative GPA: 3.40/4.00

Experience

Undergraduate Machine Learning Researcher

Atlanta, GA

Georgia Tech Vertically Integrated Projects (VIP) — Baseball Analytics

Jan. 2026 – Present

- Building AWS data infrastructure to centralize 30M TrackMan pitches using RDS PostgreSQL, S3, Terraform, IAM, and GitHub Actions for repeatable deployment and shared access across analytics projects.
- Led a 4-person Stuff+ subgroup within a 20-member research team and authored roughly 80% of a 650-line modular Python pipeline processing 1M+ pitch records across 3 years.
- Re-engineered the application workflow with modular data processing, feature engineering, leakage-safe train/test splits, and XGBoost + FLAML to produce repeatable Stuff+ leaderboards.

Projects

LineLens | Python, Streamlit, Supabase, REST APIs

May 2026 – Present

- Built and deployed a 27-file Python/Streamlit application with roughly 2.5K application lines and 1.8K test lines, processing 700–800 outcomes from 9 sportsbooks across 10–15 games per full-slate refresh.
- Designed reusable application and data-processing components integrating external REST APIs, market data, ranking logic, and backend services.
- Implemented Supabase-backed persistent storage and automated grading workflows for saved odds, stakes, completed MLB scores, and portfolio performance metrics.

GT WebDev — Project Discovery MVP | MongoDB, Express.js, React.js, Node.js, Git

Feb. 2026 – Apr. 2026

- Developed backend authentication and profile services using Express.js, MongoDB, JWT, and bcrypt, including protected REST API routes for user-specific workflows.
- Designed database-backed username/email validation and project schemas supporting authenticated user and project workflows.
- Collaborated on a 7-person engineering team to build, test, debug, and integrate a functional MERN MVP using Git-based code review and shared development workflows.

Leadership & Campus Involvement

Data Science @ Georgia Tech

Atlanta, GA

Data Science Bootcamp

Feb. 2026 – Apr. 2026

- Completed 30+ hours across 8 hands-on workshops using Python, Pandas, NumPy, scikit-learn, Matplotlib, and Seaborn for exploratory analysis, data cleaning, preprocessing, visualization, and machine-learning workflows.
- Applied train/test splitting, cross-validation, feature scaling, PCA, feature selection, hyperparameter tuning, and ensemble methods while gaining introductory exposure to LoRA and RAG concepts.

Pi Kappa Alpha

Atlanta, GA

Vice President of Philanthropy

Jan. 2026 – Present

- Helped organize a 12-bout Fight for Life charity boxing event for roughly 500 attendees that raised \$35K+ and supported outreach across 6 sponsors for the 130-member chapter.
- Leading a Fall 2026 charity 5K targeting \$6K and roughly 200 participants, coordinating sponsor and partner outreach, campus logistics, volunteer staffing, and execution.

Additional Experience & Certifications

Head Lifeguard

Atlanta, GA

United Pools

May 2024 – Aug. 2025

- Managed scheduling and shift coverage for a 20-lifeguard team during my second summer while helping oversee pool safety, staffing, and emergency readiness for up to 50 swimmers at a time.

FAA Private Pilot Training

Aug. 2024 – Dec. 2024

- Completed 60+ hours of flight and ground training in navigation, weather analysis, aeronautical decision-making, and risk management; passed FAA Private Pilot Airplane knowledge exam.

Technical Skills & Tools

Cloud & Developer Tools: AWS RDS, S3, Terraform, IAM, GitHub Actions, PostgreSQL, Git/GitHub

Languages: Python, Java, SQL, JavaScript, C++

Software & Data: Node.js, Express.js, React.js, REST APIs, MongoDB, Supabase, Streamlit, Pandas, NumPy
